Encryption algorithm (Project)

1) Write a program that reads a text file and, after encrypting the read file, writes the encrypted text to the same file.

Continue the program to do the opposite (decrypt a text saved in a file).

USE THE TEXT FILE IN THE PROJECT FOLDER WITH THE NAME TEXT.TXT

DELIVER UNCOMPRESSED (CPP OR C OR TXT)

Menu

1 – Encrypt text

2 – Decrypt text

3 – Show text

9 - Exit

Caesar cipher: move three characters forward in the alphabet.
